HYALORAL®

Effect of an oral chondroprotective drug in the preventive treatment of elbow dysplasia in Labradors

Simón Martí Angulo, Núria García López. Fundación Once del Perro Guía (FOPG).

OBJECTIVE

- Prevention:** To study the incidence of elbow dysplasia in Labrador dogs treated with a prophylactic oral chondroprotective drug vs non-treated dogs.
- Treatment efficacy:** Clinical follow-up of the animals diagnosed with joint dysplasia (treated vs non-treated).

MATERIAL AND METHODS

Prophylactic and comparative exploratory study in Phase IV.

- 105 dogs (107 joints) of 3-month old Labrador Retrievers.
- Two groups:**
 - Control:** Specific diet without supplement
 - Treatment:** Specific diet with supplement
- Supplement** (Hyaloral®, Pharmadiet S.L.U.): tablets composed of hyaluronic acid (20mg), enzymatic hydrolysed collagen (2.2g), glucosamine (500mg), chondroitin sulphate (200mg) and gamma oryzanol (100mg), doses according to weight.
- 4 follow-up visits at 3, 6, 12 and 20 months.
- Safety:** Follow-up of undesired effects.
- Clinical evaluation** (according to the FOPG protocol)
 - Physical examinations (anamnesis and vital signs)
 - Physiological joint controls (limp, range of movement and swelling)
 - X-ray controls (12 months)
 - Serological and blood tests (blood count and biochemistry)
 - Joint and dysplasia assessments by the educator and veterinarian

PREVENTION RESULTS

- Dysplasia (at 12 months):
 - Control group: 35.8% of dogs**
 - Treatment group: 18.5% of dogs**(significantly statistical differences: $p \leq 0.05$)
- Affected joints:
 - Elbow: 72.4% of cases.
 - Hip: 27.6% of cases.
 - Cases of shoulder dysplasia were not diagnosed.

EFFICACY RESULTS

- Animals with radiological diagnosis of joint dysplasia, in both groups. Dogs with dysplasia not suitable as guide dogs.
- Physiological control:**
 - After 12 months, differences between groups ($p < 0.05$) in the most affected joints (left elbow).
 - Significant differences ($p < 0.05$) at 20 months in all the parameters evaluated: limping, reduced mobility and swelling in both joints.
- Physical examination:** at visit 3, 88.89% of dogs with joint disorders in the control group vs 40% in the treated group. At the last visit, the difference was 100%.

- Additional controls** (blood and serum tests): differences in the values between both groups were not observed.
- Safety:** adverse events were not reported in either study group.

Dysplasia symptoms:

Symptoms dysplasia		Treatment				Total (n=29)		p
		CONTROL (n=19)		HYALORAL (n=10)				
		N	%	N	%	N	%	
12 months	No	9	47.4%	8	80%	17	58.6%	0.13
	Yes	10	52.6%	2	20%	12	41.4%	
20 months	No	0	0%	10	100%	10	34.5%	0.00*
	Yes	19	100%	0	0%	19	65.5%	

* $p < 0.01$, significant differences between groups.

Educator evaluation (up to 12 months):

- Control group: negative assessments in all visits, increasing in each visit up to 33.33%.
- Treatment group: negative assessments only in the 2nd visit in 40% of the cases, all of which were completely positive in visit 3.

PREVENTION CONCLUSIONS

- Incidence of elbow dysplasia in Labrador dogs is 30% in the normal population.
- In this study:
 - Incidence of 35.8%** was confirmed in the **control group**.
 - Incidence was significantly reduced in the **treatment group**, up to **18.5%**.
- Preventive action in the appearance of joint dysplasia in the treatment group vs the control group (95% probability).**

EFFICACY CONCLUSIONS IN DYSPLASIA TREATMENT

- Radiological diagnosis of joint dysplasia at 12 months.
- Treatment efficacy:
 - Limping in the treatment group showed significant improvement vs the control group.
 - At 20 months, all the symptoms and signs of dysplasia in the treatment group showed improvement, versus the control group.**
- Effective treatment for joint dysplasia symptoms.**

HYALORAL®

Hyaloral Large and Giants Breeds
120 tablets
Hyaloral Large & Giants Breeds
360 tablets Presented in blisters of 12

Hyaloral Gel
50 ml
Oral use

Hyaloral Small and Medium Breeds
90 tablets.
Hyaloral Small and Medium Breeds
270 tablets.
Presented in blisters of 10

Indications of use

A comprehensive formula that delivers essential nutrients to **support the proper development and maintenance of joints, tendons, and ligaments**

Instructions for use

Hyaloral® Gel/solution

- Kittens: 1.5 ml per day.
- Adult cats: 3 ml per day.

Dogs:

- Up to 5 kg body weight: 1.5 ml per day.
- From 5 to 10 kg body weight: 3 ml per day.
- Ferrets and rodents: 0.5 ml per kg of body weight per day.

Hyaloral® Small and Medium breeds

Dogs: 1 tablet per 5 kg body weight per day.

Hyaloral® Large and Giants breeds

Dogs: 1 tablet per 20 kg body weight per day in a single dose.
· From 40 kg body weight, 2 tablets in a single dose. It is recommended to incorporate **Hyaloral®** to the daily diet for a minimum of 3 months.

Composition per tablet

Hyaloral® Gel/solution per ml:

Enzymatic hydrolyzed collagen 182 mg; Glucosamine 26.9 mg; Chondroitin sulfate 16.6 mg; Gamma oryzanol 8.30 mg; Hyaluronic acid 1.64 mg.

Hyaloral® Small and Medium Breeds per tablet:

Enzymatic hydrolyzed collagen 600 mg; Glucosamine 86.2 mg; Chondroitin sulfate 54.6 mg; Gamma oryzanol 27.3 mg; Hyaluronic acid 5.45 mg.

Hyaloral® Large and Giants Breeds per tablet:

Enzymatic hydrolyzed collagen 2.20 g; Glucosamine 313 mg; Chondroitin sulfate 200 mg; Gamma oryzanol 100 mg; Hyaluronic acid 20.0 mg.

HYALORAL® PLASMA

Hyaloral Plasma 120 tablets
Hyaloral Plasma 360 tablets
Hyaloral Gel 50 ml
Oral use

Indications of use

A comprehensive formula, with nutrients that **support the proper development and maintenance of joints, tendons, ligaments and to support the normal general immune response of the animal**

Instructions for use

Hyaloral® PLASMA Gel/solution

- Kittens: 1.5 ml per day. • Adult cats: 3 ml per day.

Dogs:

- Up to 5 kg body weight: 1.5 ml per day.
- 5-10 kg body weight: 3 ml per day.
- Ferrets and rodents: 0.5 ml per kg of body weight per day.

Hyaloral® PLASMA

Dogs: 1/4 tablet/5 kg of body weight per day in a single dose.
Over 40 kg of body weight, 2 tablets a day in a single dose.
Tablet divisible by 4, allowing to dose according to the weight of the pet.
It is recommended to be mixed with the animal's regular food for 3 months minimum. As it is a complementary feed, it can be used continuously.

Composition per tablet

Hyaloral® PLASMA Gel/solution per ml: Enzymatically hydrolysed collagen 182 mg; Glucosamine 26.9 mg; Chondroitin sulphate 16.6 mg; Plasma proteins 9.00 mg; Gamma oryzanol 8.30 mg; Hyaluronic acid 1.64 mg.

Hyaloral® PLASMA per tablet: Enzymatically hydrolyzed collagen 2.20 g; Glucosamine 313 mg; Chondroitin sulphate 200 mg; Gamma oryzanol 100 mg; Plasma proteins 100 mg; Hyaluronic acid 20.0 mg.

INFLAVET®

Contains 60 tablets in blisters of 10

Indications of use

Naturally aids the **body's response to inflammation, reducing swelling and discomfort.**

Instructions for use

Cats: Half a tablet per day.

Dogs:

- Up to 10 kg of body weight: half a tablet per day.
- 10–20 kg of body weight: 1 tablet per day.
- 20–30 kg of body weight: 1.5 tablets per day.
- From 30 kg of body weight: 2 tablets per day.

If preferred, mix with food.

Composition per tablet

Scutellaria baicalensis dried root 100 mg (Baicalin 80.0 mg);
Boswellia serrata extract 76.9 mg (Boswellic acids 50.0 mg); *Vitis vinifera* dried leaves 50.8 mg (Resveratrol 50.0 mg).

OSCAN®

Contains 60 tablets in blisters of 10

Indications of use

Nutritional support for growing animals, to **assist in the development of bones and cartilage.**

Instructions for use

Cats: 1 tablet per day.

Dogs:

- 1 tablet per 10 kg of body weight per day.
- From 30 kg of body weight: 4 tablets per day.

Composition per tablet

Enzymatic hydrolyzed collagen 265 mg; Calcium 136 mg;
Vitamin C 5.10 mg; Folic acid 900 µg; Vitamin D3 2.50 µg.

VETGASTRIL[®] PLUS

Indications of use

Complementary nutrition supporting **gastric imbalances and promoting healthy digestion.**

Instructions for use

GEL

Cats:

- <5 kg of body weight: 1 ml/day.
- >5 kg of body weight: 2 ml/day.

Dogs:

- Up to 5 kg of body weight: 1 ml/day.
- 5-10 kg of body weight: 2 ml/day.
- 10-15 kg of body weight: 3 ml/day.
- 15-20 kg of body weight: 4 ml/day.
- 20-25 kg of body weight: 5 ml/day.

Ferrets, rodents and birds: 0.2 ml per kg of body weight.

Oral route. Shake before use. Take 1-2 hours before the usual feed. If preferred administer half the dose every 12 hours. Animals should always have access to water.

TABLETS

Dogs:

- 1 tablet/20 kg body weight per day.
- From 40 kg body weight, 2 tablets per day.

Oral route. Take 1-2 hours before the usual food. If preferred administer half the dose every 12 hours. Animals should always have access to water.

DAFORTE[®] PLUS

Includes a 50ml bottle with dosing syringe for oral administration.

Indications of use

A formula enriched with nutrients that **support the intestinal system in addressing specific imbalances** in dogs and cats.

Instructions for use

Cats:

- Up to 5 kg of body weight: 2 ml/day.
- >5 kg of body weight: 4 ml/day.

Dogs:

- Up to 5 kg of body weight: 2 ml/day.
- 5-10 kg of body weight: 4 ml/day.
- 10-15 kg of body weight: 6 ml/day.
- 15-20 kg of body weight: 8 ml/day.
- From 20 kg of body weight: 10 ml/day.

Shake before use. Administer 2 times a day, dividing the daily amount in two doses.

Composition per ml

Fructo-oligosaccharides (FOS) 98.0 mg; Brewer's yeast (MOS) 98.0 mg; Attapulgit 19.5 mg; *Enterococcus faecium* 2.00 10⁸ UFC; Potassium chloride 9.00 mg; Sodium chloride 1.50 mg; Zinc 0.35 mg.

VETREGUL®

Includes a 50ml bottle with dosing syringe.

Indications of use

Natural formula positively supporting the **digestive tract and aiding in the elimination of hairballs**

Instructions for use

Cats:

- **Up to 1 year old:** 0.5ml per day.
- **Adult cats:** 1 ml per day.

Dogs:

- 0.5 ml per 5 kg of weight per day.
- **From 35 kg of weight:** 4 ml per day.

Ferrets and rodents: 0.2 ml per day.

Mix with the animal's regular food.

Animals should always have access to water.

It is recommended to follow up after 6 months of use.

Composition per ml

Malt 572 mg; **Fructo-oligosaccharides** 86.0 mg; ***Yucca shidigera*** 18.0 mg (**Saponins** 9.00 mg).

HEPATOSIL[®] PLUS

Box with 30 tablets with envelopes.

Box with 30 tablets with envelopes.

Boxes with 30 and 60 tablets with envelopes.

Each pack includes 50 ml bottle with dosing syringe. Oral use.

Indications of use

A formula enriched with nutrients that **support the proper functioning of liver cells**

Instructions for use

Hepatosil[®] PLUS GEL

Dogs and Cats:

1 ml per 5 kg of body weight per day.
Shake before use. It is recommended to be mixed with the animal's regular food.
Water should be available at all times.
It is recommended to follow up after 6 months of use.

Hepatosil[®] PLUS Small Breeds

Dogs and Cats:

- Up to 7 kg of body weight: 1 tablet per day.

Hepatosil[®] PLUS Medium Breeds

Dogs:

- From 7 to 10 kg of body weight: 0.5 tablet per day.
- From 10 to 15 kg of body weight: 0.75 tablet per day.
- From 15 to 20 kg of body weight: 1 tablet per day.

Hepatosil[®] PLUS Large Breeds

Dogs:

- From 20 to 30 kg of body weight: 1 tablet per day.
- From 30 to 35 kg of body weight: 1.5 tablets per day.
- From 35 to 40 kg of body weight: 2 tablets per day.
- From 40 kg of body weight: 2.5 tablets per day.

It is recommended that it be mixed with the animal's regular food.
The animals should always have access to water.
It is recommended to follow up after 6 months of use

Composition

Hepatosil[®] PLUS GEL per ml:

Brewers' yeasts 40 mg (Glutathione 1.2 mg); Milk thistle extract 45.5 mg (Silybin 15.0 mg); Taurine 100.0 mg; D,L- Methionine 20.0 mg; Vitamin E 6.00 mg; Selenium 6.50 µg; Zinc 3.5 mg; Vitamin B1 5.0 mg; Vitamin B12 20.0 µg; Folic acid 50.0 µg.

Hepatosil[®] PLUS Small Breeds per tablet:

Brewers' yeasts 312 mg; Vitamin B1 25.0 mg; Thistle seed 49.5 mg (Silybin provided 15.0 mg); Zinc 12.5 mg; Vitamin E 6.00 mg; Folic acid 50.0 µg; Vitamin B12 20.0 µg; Selenium 6.50 µg.

Hepatosil[®] PLUS Medium Breeds per tablet:

Brewers' yeasts 1120 mg; Vitamin B1 100 mg; Thistle seed 224 mg (Silybin provided 68.0 mg); Zinc 50.0 mg; Vitamin E 24.0 mg; Folic Acid 200 µg; Vitamin B12 80.0 µg; Selenio 26.0 µg.

Hepatosil[®] PLUS Large Breeds per tablet:

Brewers' yeasts 1340 mg; Vitamin B1 120 mg; Thistle seed 297 mg (Silybin provided 90.0 mg); Zinc 70.0 mg; Vitamin E 32.0 mg; Folic acid 240 µg; Vitamin B12 96.0 µg; Selenium 36.0 µg.

IRCVET[®]

GEL

Includes a 50ml bottle with dosing syringe.
Oral use.

Indications of use

Nutritional support that aids in the **normal functioning of the renal system in dogs and cats**

Instructions for use

Cats:

- <5 kg of body weight: 1 ml daily.
- >5 kg of body weight: 2 ml daily.

Dogs:

- 1 ml / 5 kg body weight per day.
- From 35 kg body weight: 8 ml per day.

Ferrets and rodents: 0.2 ml per day.

Shake before use.

Mix with the usual feed.

Animals should always have access to water.

It is recommended to follow up after 6 months of use.

Composition per ml

Taurine 50.0 mg; **Calcium carbonate** 45.0 mg; **Calcium acetate** 40.0 mg; **Vitis vinifera dry leaves** 25.4 mg (**Resveratrol** 25.0 mg); **Potassium** 19.0 mg; **Artichoke extract** 14.8 mg (**Cynarin** 740 µg); **Salmon oil** 6.43 mg (**EPA** 630 µg; **DHA** 514 µg); **Vitamin B6** 330 µg; **Folic acid** 36.0 µg; **Vitamin B12** 0.190 µg.

IRCVET[®]

TABLETS

Box containing 60 tablets, in blister packs of 10.

Indications of use

Nutritional support formulated with specific nutrients that **aid in the normal functioning of the renal system in dogs and cats.**

Instructions for use

Cats: 0.5 tablet per day.

Dogs:

- Up to 10 kg of body weight: 0.5 tablet daily.
- 10–20 kg of body weight: 1 tablet daily.
- 20–30 kg of body weight: 1.5 tablets daily.
- Over 30 kg of body weight: 2 tablets daily.

To be taken with food. If preferred, the tablets can be crushed and mixed in with animal regular food.

Animals should always have access to water.

Composition per tablet

Calcium acetate 240 mg; **Vitis vinifera leaves** 102 mg (**Resveratrol** 100 mg); **Artichoke extract** 60.0 mg (**Cynarine** 3.00 mg); **Green tea dry leaves** 20.0 mg (**EGCG** 10.0 mg); **Vitamin B6** 1.30 mg; **Folic acid** 134 µg; **Vitamin B12** 0.66 µg.

Includes one 50ml bottle with a dosing syringe. Oral use.

Indications of use

Formula with nutrients that help in the normal **maintenance of the urinary system, in particular the lower urinary tract.**

Instructions for use

Dogs & cats:

1 ml / 5 kg of body weight/day.
Oral use.
Shake before use.

Composition per ml

Glucosamine 100.0 mg; D-mannose 90.0 mg; Cranberry fruits 60.0 mg; Horsetail powder 35.0 mg; Tryptophan 15.0 mg; Chondroitin sulphate 15.0 mg; Hyaluronic acid 8.00 mg.

Contains 30 tablets, in blister strips of 10.

Indications of use

Nutritional support for dogs and cats in **extended-release bilayer tablet**, formulated with nutrients that promote the proper **functioning of the entire urinary system, particularly the lower urinary tract**

Instructions for use

Cats: 0.5 tablet / 5 kg of body weight per day.
Dogs: 1 tablet / 10 kg of body weight per day.
It is recommended to take the tablets whole or half. Do not crush.

Composition per tablet

Bottom layer (immediate release) / Cranberry dried fruits 80.0 mg; D-mannose 160 mg; *Equisetum arvense* powder 70.0 mg
Top layer (extended release) / Cranberry dried fruits 40.0 mg; HC-15 Complex: Sodium hyaluronate 30.0 mg; Chondroitin sulphate 30.0 mg.

LACTADIET®

FOR KITTENS
WITH
COLOSTRUM

300g box with 40 sachets
(1 sachet 7.5g). Bottle and
2 teats included

1005g box with 135
sachets (1 sachet 7.5g).
Bottle and 2 teats
included

Indications of use

Instant formula enriched with nutrients that **support the development of kittens from birth to weaning.**

Instructions for use

Guidance for the correct development on milk volume necessary for a correct development of the kitten.

Baby animal age	Cats aged 1-15 days	Cats aged 15-45 days	Ferrets aged 1-7 days	Ferrets aged 7-15 days	Ferrets aged 15-45 days
Number of daily intakes	6-10	4-6	5	5	5
Total volume (ml/day)	20-40 ml	40-100 ml	3 ml	4-8 ml	8-12 ml

*From 45 days old until the end of weaning, the number of daily feedings and the quantity of milk substitute will be adjusted based on the infants needs.

Composition per sachet:

CELL HEALTH AND PROTECTION

PROFILAXCEL®

Box of 30 capsules in blisters
of 10

Indications of use

A formula enriched with **essential fatty acids and nutrients that support the proper functioning of various organs, including the mammary glands and prostate gland**

Instructions for use

Cats: 1 capsule every 2 days.

Dogs:

Under 30kg body weight: 1 capsule every 2 days.

Over 30kg body weight: 1 capsule daily.

If you prefer, mix the contents of a capsule with the animal regular feed.

Composition per capsule:

Linseed oil 300 mg (Oleic acid (Omega 9) 52.5 mg, Linoleic acid (Omega 6) 52.5 mg, Linolenic acid (Omega 3)) 173 mg); Pomegranate seed oil 100 mg (Punicic acid (Omega 5)) 70.0 mg); Seaweed oil 87.5 mg (DHA (Omega 3)) 35.0 mg).

LAGRINET[®] NEO

Contains 10 ml multidose bottle, with OSD dosing device.

Indications of use

Hydrating solution for eye hygiene and care.

Instructions for use

Open the bottle and apply one drop to each eye by gently squeezing the container. As it contains no preservatives, it can be used as often as needed. The multi-dose OSD system allows use for up to 3 months after first opening. Suitable for continuous use.

Composition per 100ml

Distilled *Aloe vera* water 10 g; Distilled *Centella asiatica* water 10 g; Sodium hyaluronate 0.15 g.

LACRISTAL[®] NEO

Contains 10 ml multidose bottle, with OSD dosing device.

Indications of use

Eye solution with a balanced formula that cleans the eye without causing irritation, providing protection against harmful external pollutants.

Instructions for use

Open the bottle and apply one drop to each eye by gently squeezing the container. As it contains no preservatives, it can be used as often as needed. The multi-dose OSD system allows use for up to 3 months after first opening. Suitable for continuous use.

Composition per 100ml

N-Acetylcarnosine 1.00%; Chondroitin sulfate 0.15%; extract *Vaccinium myrtillus* 0.0003%.

LUTEIN VITOFTAL[®] PLUS

50 ml bottle with dosage syringe. Oral gel

Indications of use

Formula based on nutrients that support the animal's ocular system.

Instructions for use

Cats:

- Up to 5 kg of body weight: 1 ml per day.
- Over 5 kg of body weight: 2 ml per day.

Dogs:

- 1 ml per 5 kg in weight per day.
 - From 35 kg in weight: 8 ml per day.
- Shake before use. Preferably mix with regular feed.

Composition per ml

Omega 3 from fish oil 26.2 mg (EPA+DHA: 24.2 mg); Taurine 25.3 mg; Algae meal with astaxanthin 13.9 µg; Vitamin C 5.17 mg; Dry marigold flowers with lutein 4.12 µg; Dry green tea leaves with EGCG 2.06 mg; Dry marigold flowers with zeaxanthin 2.06 mg; Zinc 616 µg; D-panthenol 577 µg; Dry *Vitis vinifera* leaves with resveratrol 525 µg; Vitamin E 341 µg; Lycopene from tomato pulp 308 µg; Vitamin A 209 µg; Vitamin B6 209 µg; Vitamin B2 176 µg; Vitamin B1 154 µg; Copper 82.5 µg; Selenium 20.9 µg.

NACOTIL®

Contains a 125 ml. bottle.
Non-oily solution. pH=7.
Otic route

Indications of use

Non-irritant otic solution for external use designed for regular hygiene and cleaning of the ear and ear canal. **Helps maintain the physiological conditions of the ear.**

Instructions for use

1. Position the ear canal as vertically as possible. 2. Apply the product by gently squeezing the container to fill the ear canal with the required amount of **NACOTIL®**, according to its capacity. 3. Massage the base of the ear to ensure even distribution of the product. 4. Clean if necessary:

- Use sterile gauze or cotton to gently clean the inside of the ear canal.
- After cleaning, apply 2–3 additional drops of **NACOTIL®**.
- Wipe the outside of the cannula with clean gauze.

Use **NACOTIL®** for the maintenance of the physiological conditions of the ear. Wait 30 minutes before any subsequent application. For individual use.

Composition per 100ml

N-Acetyl-cysteine 1.0 g; **Boric acid** 1.4 g; **Sodium hyaluronate** 200 mg; **Zinc gluconate** 2.0 g; **Citrus medical limonum essential oil** 100 mg.

OTINET®

Contains 125 ml bottle.
Non-oily solution. pH=5.5.
Otic route.

Indications of use

Otic cleaning solution for external use, non oil based with pH 5.5. Used to regularly clean outer ear. Alcohol free

Instructions for use

Shake the content before use. Squeeze the container and apply the **OTINET SOLUTION** into the ear canal, whilst stretching the ear lobe. Perform a light massage of the ear to allow the correct distribution of the product. If required, clean the inner ear with cotton wool or sterile gauze. Follow veterinarian instructions.

Composition per 100ml

citrus medical limonum essential oil water 10 g.

OLEODERM®

Pack of 360 capsules in blisters of 10.

Pack of 60 capsules in blisters of 10
